THE REPLY FILED 21 October 2008 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☐ The period for reply expires _____ months from the mailing date of the final rejection.
b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☒ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because

(c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: See Continuation Sheet. (See 37 CFR 1.116 and 41.33(a)).

5. ☐ Applicant's reply has overcome the following rejection(s): _____.
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☐ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
The status of the claim(s) is (or will be) as follows:
Claim(s) allowed: _____.
Claim(s) objected to: _____.
Claim(s) rejected: _____.
Claim(s) withdrawn from consideration: _____.

Examiner, Art Unit 2614

Continuation of 3. NOTE: The applicant has amended the claims and further consideration and/or search is required. Additionally, the newly recited language of " a virtual line extending from a partition wall " and " center point of an opening of the speaker" constitutes new matter.

The specification discloses on page 27 that " In FIGS. 10A and 10B, the inside of the cabinet is diagonally divided by a partition wall 4, as shown in FIG. 10A, to form upper and lower (or left and right) two rectangular-pole shaped space, and first and second openings 8 and 9 are bored on the bottom board 6D and the rear board 6BI, respectively. In this case, as shown with virtual lines in FIG. 10A, two partition walls 4 may be disposed crosswise in diagonal directions to divide the cabinet into quarters: a first through a fourth triangular- pole shaped quadrant chambers 28a through 28d, and, with respect to the third chamber 28c, the first opening 8 may be bored on the left side board thereof. ". The virtual lines are representative of the partition walls and do not extend from the partition wall as newly recited. Regarding the center point of an opening language the specification recites on pages 4-5 that " As described above, a cabinet used for the guitar amplifier is mostly of either open back box baffle, sealed box baffle or bass reflex and is made of non-resonant solid thick wood boards; and since sound energies are emitted in concentric waves from the center of a point where the speaker is attached, there is no sound emission similar to those emitted from the body of an acoustic guitar, and in addition, a high frequency range is restrained by a felt or the like overlaid on the surface of the cabinet and sound signals are emitted as a reproduction sound close to electric signals, which contains less harmonic tones. " This is not to disclose the newly claimed subject matter.
